Recent Computing Security graduate from Rochester Institute of Technology Dubai with hands-on experience in cybersecurity, SIEM engineering, AI/LLM applications, and network security. CEH v13 certified and currently pursuing CCNA, CPENT, and Microsoft AZ-104. Seeking an entry-level Cybersecurity, Security Engineer, SOC Analyst role.

EDUCATION

Rochester Institute of Technology *United Arab Emirates, Dubai* **2022 - 2026**

Bachelor of Science, Cyber Security

CGPA: 3.40/4.00 4 x Dean's List

Relevant courses – Penetration Testing, Malware Reverse Engineering, Network Security and Forensics, Machine Learning and Cyber Analytics, Risk Management for Information Security, Computer Systems Security

Capstone Project – AI-based information management system for faculty members

PROFESSIONAL EXPERIENCE

Security Engineer Intern

May 2025 – May 2026

Maguire

- Built and maintained production log data pipelines for security event processing using the ELK stack
- Developed Logstash pipelines with parsing and transformation logic for structured telemetry
- Created Kibana dashboards and wrote ES|SQL queries for event correlations and threat analysis
- Implemented Elasticsearch ingest pipelines with Painless scripting for data normalization
- Administered RaptorX XDR/SIEM platform to manage and analyze client security data

Network Security Analyst Intern

July 2023 – August 2023

ALEC

- Configured and managed firewalls to enhance network security
- Monitored live systems, identified and evaluated potential threats and vulnerabilities
- Monitored network traffic and investigated security alerts to detect potential threats
- Collaborated on threat assessments and identified vulnerabilities in live systems
- Supported the investigation and resolution of security incidents, including analyzing logs

PROJECTS

Machine learning-based IDS for IoT Environment *December 2025*

Retrieval-Augmented Generation (RAG), Large Language Models (LLMs), Shibboleth

Detection of Active Directory Kerberos Exploitation with Wazuh EDR *September 2025*

SIEM, Active Directory, Wazuh EDR, Penetration Testing, Incident Detection

Risk Assessment Report: NIST SP 800-30r1 *November 2024*

Risk Assessment, NIST SP 800-30r1, Vulnerability Analysis, Risk Management, Reporting.

Hybrid Encryption Analysis *September 2024*

Cryptography, Hybrid Encryption, Frequency Analysis, Cipher Design, Security Analysis.

Reverse Engineering Binary Code *May 2024*

Reverse Engineering, Debugging, Assembly Language, Disassembly Tools, Binary Exploitation.
