Golden Visa Holder | RTA Driving License & Vehicle Holder

PROFESSIONAL SUMMARY

Computing Security graduate (RIT Dubai), CEH v13-certified, with hands-on SIEM/EDR administration, log analysis, and network security monitoring experience from two security internships. Seeking a SOC Level 1 Analyst role to apply alert triage, escalation, and incident documentation skills within a 24/7 SOC environment.

EDUCATION

Rochester Institute of Technology, Dubai, UAE

2022 – 2026

Bachelor of Science, Computing Security

Related Coursework: Network Security & Forensics, Computer Systems Security, Risk Management for Information Security, Authentication, System Administration, Cybersecurity Policy & Law

GPA: 3.40/4.00 | Dean's List (4x)

RELEVANT EXPERIENCE

Maguire, Dubai, UAE

Security Engineer Intern (Co-op)

June 2025 – June 2026

- Improved security event visibility across 56 data sources by building production ELK Stack ingest pipelines.
- Reduced alert triage time by developing Logstash parsing and transformation logic for structured telemetry.
- Developed ES|QL correlation queries and Kibana dashboards to deliver analyst-ready detection use cases.
- Supported 36 client environments by administering the RaptorX XDR/SIEM platform and maintaining reliable security monitoring.
- Automated security data parsing and transformation using Ruby scripting and Elasticsearch ingest pipelines to improve log processing efficiency.

ALEC, Dubai, UAE

Network Security Analyst Intern

Jul 2023 – Aug 2023

- Hardened the network perimeter by configuring and managing firewall policies, reviewing and tuning firewall rules to strengthen security controls.
- Identified and validated threats and vulnerabilities through continuous monitoring of live systems and analysis of network traffic.
- Accelerated incident resolution by investigating security alerts and correlating logs across multiple systems.
- Utilized Fortinet solutions, including FortiGate and FortiSIEM, to support network security operations and threat monitoring.

KEY PROJECTS

SOC & Security Monitoring Projects & Labs *(On Github & LinkedIn)*

- SOC Home Lab: EDR Monitoring, Threat Detection & Automated Response — built a LimaCharlie EDR lab with Sysmon telemetry, C2 simulation, and automated D&R rules to detect credential dumping and ransomware activity
- Active Directory Kerberos Exploitation Detection with Wazuh — deployed Wazuh EDR and authored custom detection rules to identify and alert on CVE-2022-33679 Kerberos attack activity
- Network Security & Forensics Labs — deployed Snort IDS and iptables, and used Security Onion/Kibana for centralized log monitoring, alerting, and forensic investigation
- Malware Analysis: Multi-Stage PDF Dropper — performed static/dynamic analysis and memory forensics to document a dropper's C2 behavior and indicators of compromise

SKILLS & CERTIFICATIONS

SOC & Monitoring: SIEM/EDR administration (Elastic Stack, RaptorX XDR, Wazuh), log analysis & correlation, alert triage & escalation, Sysmon, Kibana dashboards, incident documentation, phishing investigation support

Networking & Systems: Firewall management (FortiGate), TCP/IP, network traffic analysis, Windows/Linux, Active Directory, Snort IDS, Python & Ruby scripting

Certifications: CEH v13 | Google Cybersecurity Professional | Fortinet NSE 3 | TCM PWST | Cisco CCNA (In Progress)
